

## MAIN APPLICATIONS

FIT LOCK is a revolutionary patented system that allows quick and easy positioning of panels both on ceilings and/or on walls. The concentric locking system of FIT LOCK allows the adjustment of the position once they are put in place.

FIT LOCK is easy to remove and to reposition, allowing the more complicated operations of inspection-maintenance or their replacement if needed.

The unit is a MUST in the boat market, for the positioning of ceiling panels and side panels and is largely used in the railway, automotive, motor home, exhibition and building markets.

---

## TECHNICAL CHARACTERISTICS

MATERIAL	:	acetylic
FIRE RESISTANCE	:	self extinguishing
COLOUR	:	white
SIZE	:	60 mm diameter
TRACTION FORCE	:	22 Kg.

---

MATERIAL	:	nylon
FIRE RESISTANCE	:	//
COLOUR	:	grey
SIZE	:	60 mm diameter
TRACTION FORCE	:	11 Kg.

---

## HOW TO USE

*MANUAL POSITIONING:* with the help of the positioning marker devices, the two components, that are part of the FIT LOCK, are installed on the elements to be connected

*CAD-CAM POSITIONING:* ideal for large surfaces, allows the reference positions of the FIT LOCK to be inserted even during the engineering phase.
